*Getting You Back to
What You Love!*

Occupational therapy is a YOU-centered practice. It focuses on adapting the environment, modifying tasks, teaching skills, and educating YOU and your family in order to increase participation in and the performance of daily activities, particularly those that are meaningful to YOU and YOUR GOALS.

Occupational Therapy can enhance your recovery following:

- » Hand, Wrist, Elbow, Shoulder Injury/ Surgery
- » Back Injury
- » Orthopaedic Surgery of the upper extremity
- » Upper extremity trauma and injury
- » Upper extremity (including hand) joint replacement
- » Wrist and Hand trauma and injury
- » Post Acute Pulmonary/ Cardiac Events
- » CVA (Cerebrovascular Attack)

Occupational Therapy also provides Custom Splinting

Occupational Therapy can help you to adapt to chronic illnesses.

The CDC estimates that 1 in 10 Americans experience limitations in daily living activities and participation in the community due to a chronic disease:

- » Arthritis
- » Neurological Disorders
- » Stroke
- » Spinal Cord Injury
- » Traumatic Brain Injury
- » Diabetes

How Occupational Therapy Helps You

Occupational Therapy matches your skills to the demands of your activities, By utilizing environmental supports, minimizing environmental barriers, and by offering solutions to challenges associated with your habits and routines.

- ✓ Analyze your daily activities and suggest appropriate adaptive equipment to improve your independence and safety.
- ✓ Evaluate your home or workplace and suggest changes and modifications that will make it easier for you to perform daily tasks.
- ✓ Address both the physical and emotional effects of your illness or injury.
- ✓ Improve your quality of life
 - ✓ Teach new skills
 - ✓ Promote a healthy and satisfying lifestyle

How to Get Started

- 1.** Talk to your doctor about your symptoms.
- 2.** Ask for an Occupational Therapy referral.
- 3.** Contact us to schedule an appointment.
- 4.** Medicare and other major insurances accepted
